

### THE ONLY AIR PURIFYING FAN TO CLEAN A WHOLE ROOM PROPERLY

Dyson designs their purifying tower fans to go beyond test chamber conditions and focus on real home conditions – this means more than just having an efficient filter. Dyson engineers and research concluded that to clean an entire room properly, you need to sense pollution events automatically, capture ultrafine pollutants and project cleaner air around the room using Air Multiplier™ technology. Only the Dyson purifying tower fan is designed and tested to do all of this.

- ✓ Senses pollutants in real time
- ✓ Captures pollutants with 360° sealed HEPA and activated Carbon filters
- ✓ Projects powerful airflow
- ✓ Intelligent Reporting on the Dyson Link App
- ✓ Oscillates up to 350°
- ✓ Draft-free backward airflow mode
- ✓ Fan mode
- ✓ Quick and easy filter changing
- ✓ Night-time mode with quiet settings
- ✓ Remote control that stores neatly on top of the machine
- ✓ Certified Asthma and Allergy friendly™
